

NeuroCyber

NeuroCyber partnership opportunities

Together, we can create a more equitable cybersecurity profession.

NeuroCyber is a registered charity dedicated to improving equity of opportunity for neurodivergent people studying, training and working in cybersecurity.

We bring together employers, educators, policymakers, researchers and the cybersecurity community to remove barriers, advance understanding and promote more inclusive recruitment, employment and career progression.

By becoming a NeuroCyber partner, your organisation will play an active role in creating meaningful change, while demonstrating a genuine commitment to equality, diversity and inclusion.

Every partnership directly supports NeuroCyber's charitable activities, helping us conduct independent research, develop practical resources, raise awareness, influence best practice and create opportunities for neurodivergent people across the cybersecurity profession.

Why partner with NeuroCyber?

Help create a more inclusive cybersecurity sector

Support practical initiatives that remove barriers and improve equity of opportunity for neurodivergent people

Advance research that drives meaningful change

Enable independent research that helps employers better understand neurodiversity and develop more inclusive workplace practices.

Champion equity of opportunity

Support the development of evidence-based guidance, resources and best practice that improve recruitment, retention, progression and workplace inclusion.

Demonstrate meaningful leadership

Show employees, customers and stakeholders that your organisation is actively investing in a more inclusive cybersecurity profession.

Join a community of change-makers

Collaborate with employers, researchers, educators, charities and government organisations committed to improving neuro-inclusion across the cyber sector.

See the difference your partnership makes

Receive regular updates demonstrating the impact of your support through research, education, events and measurable outcomes.

What your partnership helps fund

Every partnership helps NeuroCyber deliver activities that directly support its charitable objectives, including:

- Independent research into neurodiversity and cybersecurity
- Education and awareness initiatives
- Practical guidance for employers
- Neuro-inclusive events, workshops and roundtables
- Advocacy that promotes equitable access to education and employment
- Resources that help organisations become more neuro-inclusive
- Collaboration between industry, academia and the public sector
- Programmes that improve opportunities for neurodivergent people across the cybersecurity profession

Partnership principles

We believe successful partnerships are built on shared values.

NeuroCyber works collaboratively with organisations that are committed to improving equity of opportunity for neurodivergent people through meaningful action, evidence-based practice and continuous improvement.

Partnerships support the charity's mission while respecting its independence, ensuring that all research, guidance and advocacy remain impartial, evidence-based and focused on delivering public benefit.

Become a NeuroCyber Partner

By partnering with NeuroCyber, your organisation will help create a cybersecurity profession where neurodivergent people have equitable access to education, employment and career progression.
